Excisions:

Excisions Recommended But Not Made

Reasons for excisions:

Two excisions are required to remove references in the title and the dialogue to an implied sibling relationship between two men shown having sex. With these references intact the publication promotes and encourages the criminal act of incest.

**Summary of reasons
for classification:**

The computer moving image file *g Sean Cody - Brothers having sex.mpg* is classified as:
Objectionable.

The file contains a short video clip which shows two men having sex. It is implied that the men are brothers. Without excisions the publication promotes and encourages the criminal act of incest to an extent and degree that renders the availability of the material likely to injure the public good. The owner was offered the opportunity to make excisions in order to avoid the classification of "Objectionable". However, no response was received within the timeframe given.

The classification of this publication interferes with the freedom of expression. However, the decision is a reasonable and demonstrably justified limitation on the freedom of expression that reflects the concern of a free and democratic society to limit the availability of publications which promote and encourage incest.
